

CHOOZ

Carbendazim 50% WP

CHOOZ Broad Spectrum contact and Systemic Fungicide for control of Leaf Spots, Wilts, Blights, Blast, Rusts, Damping off, Mildews and Smuts.

CHOOZ is effective against a wide range of pathogenic fungi in various crops.

CHOOZ is systemic fungicide with protective and curative action.

CHOOZ has very good compatibility with commonly used agrochemicals.

CHOOZ is used in various ways i.e. seed treatment, soil drench, soil mixture and foliar spray.

CHOOZ inhibits development of germ tubes, formation of appressorium and the growth of mycelia.

Crop	Disease	Dosage / Ha (Gm.)	Dilution in water (litres)	Remarks
Paddy	Blast	250-500	750	
	Sheath Blight	2 gm/kg seed	1 lit/10kg seed	Wet slurry treatment
Wheat, Barley	Loose smut	2 gm/kg seed	1 lit/10 kg seed	Wet slurry treatment
Cotton	Leaf spot	250	750	
Jute	Seedling blight	2 gm/kg seed	1 lit/10 kg seed	Wet slurry treatment
Sugar beet	Leaf spot, powdery mildew	200	400	
Peas	Powdery mildew	250	600	
Clusterbeans	Powdery mildew	350	750	
Cucurbits	Powdery mildew, Anthracnose	300	600	
Brinjal	Leaf spot, fruit rot	300	600	
Grapes	Anthracnose	300	600	
Walnut	Downy leaf spot	3	10 ltr/tree	
Rose	Powdery mildew	1	2 ltr	
Ber	Powdery mildew	10	10 ltr/tree	
Tobacco	Frog eye spot, Anthracnose	225	750	

PACK SIZE : 100g, 250g, 500g & 1Kg.
