

GLITZZ

Fipronil 40% + Imidacloprid 40% WG

GLITZZ is a premix water dispersible Granule (WDG) formulation.

GLITZZ belongs to the Phenylpyrazole and Neonicotinoid group of insecticide Unique combination product with Dual Action (systemic & ingestion/contact) controls all species of white grubs and other soil pests with its longer persistency and greater solubility in water.

GLITZZ has good Phytotonic effect, which enhances the root growth and results in more greenness as well as higher yields

GLITZZ comparatively safer to the beneficial insects Lower chance of resistance because of dual mode of action and cost effective Suitable for IPM

| CROP | Diseases | Dosage Gms/Ha | Dilution in Water (Litres/Ha) |
|-----------|--|---------------|-------------------------------|
| Sugarcane | White grubs (Holotrichia consanguinea) | 437.5 - 500 | 1000-1250 |
| Groundnut | White grubs (Holotrichia serrata) | 250 - 300 | 1000 |

Pack size : 40g, 100g, 250g & 500g
