

TIMAA

Acetamiprid 20% SP

TIMAA belongs to neonicotinoid group of insecticide which contain active ingredient of Acetamiprid.

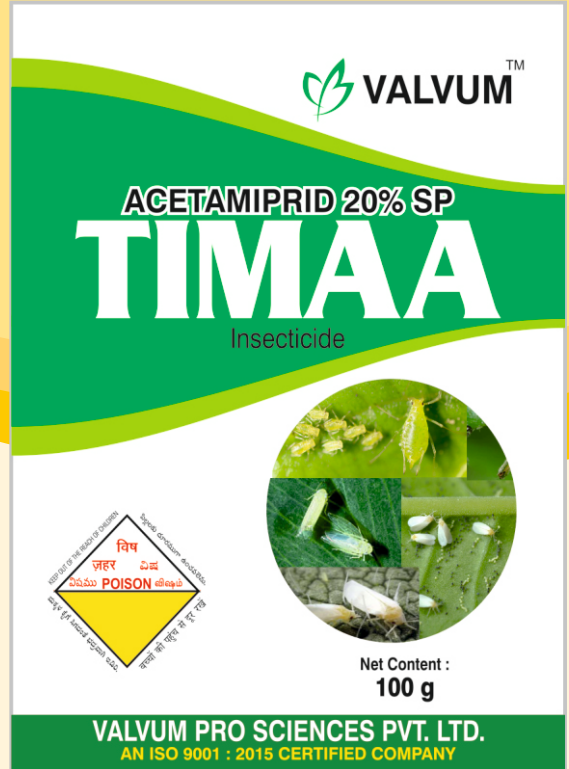

TIMAA is systemic in nature with translaminar activity with contact and stomach action. It block insect nervous system on nicotinic receptor site and inhibit the acetylcholine transmission results in insect paralysis and eventual death.

TIMAA exhibits triple action, ovicidal, adulticidal and larvicidal

TIMAA provides efficient protection on both side of leaves due to systemic and translaminar action.

TIMAA also provide protection for long duration and has quick knock down effect.

TIMAA has good compatibility with commonly used pesticide.
