

VALLY

Thiamethoxam 12.6% + Lambda Cyhalothrin 9.5% ZC

VALLY is a broad-spectrum insecticide, unique combination of Neonicotinoid and Pyrethroid group of insecticides with new innovative formulation Zeon Capsule formulation with synergistic effect.

VALLY unique solution for control of sucking pest and caterpillars, it works as systemic, contact and stomach activity insecticide, being a ZC formulation it has good rain-fastness

VALLY is absorbed rapidly by the roots and foliage, VALLY is translocated acropetally in the Xylem

VALLY promotes crop greening, more branches and flower initiation

VALLY being a premix solution no need of tank mix of other insecticide.
